

Hazard Report Form				Office Use Only Report No.:			
Please complete this form and submit to reception.				OHS Officer:			
Reported by			mile to reception		Attached Form		
Name				Surn	ame		
Phone							
Hazard Details							
Describe the hazar	d						
Describe any action taken	n						
Describe any suggestions to control hazard?							
Declaration	1	hereby decla	re the informat	ion pr	ovided abo	ve is true a	nd correct
Signed						Date	
OHS Officer Sectio	n						
Risk Assessment							
Likeliness			Consequences	5		Risk I	_evel
Controls						·	
Any existing contro	ols						Type of control
Reassessment							
Likeliness			Consequences	5		Risk I	_evel
Further action/ monitoring							
Declaration		I hereby de	clare the inforn	nation	provided a	bove is tru	e and correct
Signed						Date	

Please attach sheet if required.

RISK ASSESSMENT OVERVIEW

Types of hazards

71	
Physical	Hazards that could cause physical effects e.g. wet floors, loud noise, sharp edges, poor lighting, etc.
Ergonomic	Hazards that could cause strain injures e.g. lifting heavy objects, seat and desk height, etc.
Psychological	Hazards that could cause mental health e.g. working at heights, shift work, abuse, discrimination, etc.
Chemical	Hazards caused by chemical e.g. fumes from solvents, gas use, burns from acid, etc.
Biological	Hazards that may result in contamination or disease. Some examples are food handling, unclean air conditioners, etc.
Radiation	Hazards from a light, heat, or energy source e.g. sunburn, welding flashes, etc.
Electrical	Hazards that could cause electrocution or electrical damage e.g. exposed wires, water near power leads, too many leads into one socket, etc.

Likelihood			
Α	Rare		
В	Unlikely		
С	Unlikely Possible		
D	Likely		
E	Almost certain		

Consequences				
1	Insignificant			
2	Minor			
3	Moderate			
4	Major			
5	Catastrophic			

Risk Level Table

	1	2	3	4	5
Α	Low	Low	Medium	High	High
В	Low	Low	Medium	High	Extreme
С	Low	Medium	High	Extreme	Extreme
D	Medium	High	High	Extreme	Extreme
E	High	High	Extreme	Extreme	Extreme

Risk Level	Priority	Action
Extreme	1	Act immediately to remove risk. Either eliminate, substitute, or implement engineering controls.
High	2	Act immediately to remove risk. Either eliminate, substitute, or implement engineering controls. If controls are not able to be implemented immediately, set a timeframe, and establish some intern controls for a set period.
Medium	3	Take reasonable steps to lessen the risk. Until elimination, substitution, or engineering controls can be implemented, establish administrative and PPE controls.
Low	4	Take reasonable steps to lessen and monitor the risk. Establish permanent controls to reduce the risk.

Hierarchy of Controls				
Elimination	Eliminate the hazard.			
Substitution	Substitute with an alternate practice, material, or equipment.			
Isolation	Separate from those at risk of harm.			
Engineering	Design or set-up features to minimise the risk.			
Change work methods	Change the way work is done, review and implement good work practice.			
Personal Protective	Workers must wear personal protective equipment.			
Equipment
